

The students work on a thinking routine called the 4C's

-Connections: How can I connect the respiratory system with the other systems or things in life?

-Challenges: What challenges I think I will have learning about the respiratory system

-Concepts: What concepts do you know about the respiratory system?

-Fun Facts: About the respiratory system. Do you know any fun fact about the respiratory system?

For this thinking routine each student will receive four post-its in were they have to answer the 4C's.

Once all students are ready answering the teacher pastes a big craft paper in the classroom whiteboard divided in four spaces and students must paste their post-its. Then the whole class will read the answers and discuss them.
